🖥 Work & Education

Senior Front-End Software Engineer
1 Martie 2023 - Present

📍 Whitestone software, Bucharest (Romania)

- **Leading the architecture of a React application** with HTML canvas graphics.
- Guide the team, while testing the ground by **coding the core features**.
- Integrated a substantial portion of the business logic into the project while establishing essential workflows and tools for the team.
- Collaborating with fellow team members, I deliberated on **optimization techniques and clean coding methodologies** to ensure the project remained **swift and scalable**.
- Tasks & Technologies: Javascript, React, Redux-toolkit, Webpack/Vite (bundle jobs) , Jira, Azure, Websockets, REST, Tasks administration,
- Work methodology: Agile, Kanban

Front-End Software Engineer
May 2021 - 1 Martie 2023

📍 Arnia software, Bucharest (Romania)

- Role: Work closely with customers to develop their applications using component-based structures, manage front-end data and provide interactive user functionality for graphical applications
- Technologies: Javascript, Vue, Vuex, bootstrap, less, jira, azure
- Work methodology: Agile

Javascript Software Engineer
May 2019 - April 2021

📍 Advahoo, Bucharest (Romania)

- Role: Frontend and UI /UX, occasionally assisting the client's QA team and product owner in prioritizing tasks
- Technologies: Javascript, Ojet, react, less
- Work methodology: Agile

Frontend Developer
Between jobs

📍 Individual contracts

- Role: Development of presentation websites and web applications for data management
- Technologies: Ruby on rails, django, vue, jira
- Work methodology: Cascade, Agile

Full stack (java and frontend) - Internship
3 months

📍 Unicredit Services, Bucharest (Romania)

- Worked on the Frontend and UI/UX on a project made for a particular group of clients. Providing and implementing solutions for their needs.
- Implement Backend APIs in JAVA in concordance with Business requirements

Bachelor degree in Computer Science
3 years

📍 University of Bucharest, Bucharest (Romania)

Subjects I've been passionate about: oriented object programming, functional programming, web development and their relationship to each other. My interest in these topics also extends to the exploration of web frameworks and other web technologies and their application

🖥 Skills

Worked most with

VUE   JAVASCRIPT   REACT

Technologies and Concepts I worked with

REDUX   TYPESCRIPT   AGILE   NUXT
VUEX   PINIA   NODEJS   SOCKETS
TAILWIND CSS   VITE   WEBPACK
JIRA   BOOTSTRAP   UIKIT
RUBY ON RAILS   MONGODB
UNIT TESTING   INTEGRATION TESTING
CYPRESS   LINUX   GIT   PYTHON
DJANGO   MVC   REST   OOP   OJET

⑂ Projects

Skyline

Modular article manager in Ruby on Rails that supports database replication using Octopus gem, paragraph editing, photo galleries, user profile, search, and tags for each article. In addition to this project, I made a fully functional replication topology that worked with this application.

- Used database: MySQL
- Frontend tool kits: ui-kit3, jquery, less
- Backend: Ruby on Rails

Personal trainer site and blog

A blog and a custom personal page for a personal trainer, made in express and mongodb. The trainer can login and edit articles, add toturials with images and videos. Each on its own section. The site is simple designed and lite coded destined to be simple to read and to run fast.

- Used database: MongoDB, cloudinary
- Frontend tool kits: ui-kit3, jquery, less
- Backend: Express, EJS
